The College of Engineering is pleased to present once again its annual survey of graduates who have been out of school for five years. This year's edition has been changed in format to make its production more efficient. We welcome comments from users of the survey on this new format.

This is the fifteenth in the series of these reports which began in 1961 with a survey of the class of 1956. Most of the back issues are still available and, if an original copy cannot be provided you, a Xerox copy can be made available upon request.

We hope that alumni and employers find these surveys valuable and will contact us for information from earlier issues if they have a need for employment trends through the years.

Very truly yours,

A handwritten signature in dark ink, appearing to read "D. R. Opperman". The signature is fluid and cursive, with the first letters of the first and last names being capitalized and prominent.
